

Looking for an advanced refractory solution for channel induction furnace lining?

We have it.

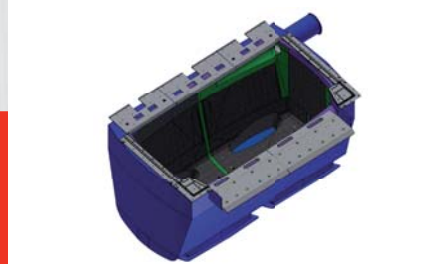

**EREDI
SCABINI**

ADVANCED REFRACTORY SOLUTIONS

ABT - Advanced Block Technology.

Modular preformed and prefired solutions for channel induction furnace linings.

Eredi Scabini's ABT solutions are kits for the modular refractory lining of furnaces that are custom-developed for each plant. They are entirely designed, produced and "quality-checked" at Eredi Scabini's plants, shipped to the customer's premises and assembled on site. The kit comprises several products, both monolithic and preformed shapes.

Main features and advantages of ABT

- 40% saving on total construction costs
- 40% reduction of plant downtimes
- 100% increase in refractory lining performance
- excellent 'non-wetting' properties and very low thermal losses.

**The ABT solutions are quick and easy to assemble
and the benefits for customers are unique!**
